

Welcome to Responsible Recycling

Thank you for choosing “Scrap My Appliance” — a partner you can trust for safe, legal, and environmentally responsible disposal of your electrical items.

This guide explains:

- What WEEE is and why it matters
- How our recycling process works
- Your role in helping the environment
- What happens to your appliance after collection

✦ What is WEEE?

WEEE = Waste Electrical and Electronic Equipment

This includes almost anything with a plug, battery, or cable. Common examples:

- Large household appliances: Fridge, washing machine, oven
- Small household appliances: Kettle, toaster, vacuum cleaner
- IT & telecoms equipment: Laptop, mobile phone, router
- Consumer equipment: TV, radio, camera
- Lighting equipment: Lamps, LED bulbs, fluorescent tubes

- Electrical tools: Drills, saws, garden equipment

⚠ Why Proper Disposal Matters

It's the law – Electrical items should not go in your general waste.

Protect the planet – Harmful chemicals can leak into soil and water.

Conserve resources – Valuable materials like copper, steel, and plastic can be recovered and reused.

✓ Our Recycling Promise

When you book with Scrap My Appliance:

We Promise: | What This Means For You:

♻ Zero to Landfill | No recyclable parts go to landfill

📄 Legal Compliance | Full WEEE Regulation compliance

🔒 Safe Handling | Hazardous materials removed safely

📦 Charity Donation | Working items go to families in need

 Transparency : Proof of disposal available on request

The Journey of Your Appliance

Step 1 – You Book With Us

Call “0800 599 9003” or book online. We give you a price and agree a collection time.

Step 2 – We Collect

Our uniformed team arrives, protects your home, and removes the appliance safely.

Step 3 – Sorting & Assessment

At our facility, we check if it works. If yes → donated. If no → sent for recycling.

Step 4 – Dismantling & Recycling

Trained staff safely remove hazardous parts, then separate metals, plastics, glass, and wiring.

Step 5 – New Life

- Metals are melted for new products
- Plastics are turned into pellets for reuse
- Glass is processed for insulation or new screens
- Hazardous waste is treated at licensed facilities

Before We Arrive – A Quick Checklist

To help us provide fast, safe service:

- ✓ Disconnect from power/water/gas
- ✓ Defrost fridges/freezers 24 hours before
- ✓ Clear access to the appliance
- ✓ Remove personal items from appliances
- ✓ Have your quote reference ready

Our team are not qualified electricians or plumbers – appliances must be disconnected before we arrive.

Environmental Impact of Your Choice

By recycling one fridge with us, you:

- Prevent 50kg of CO2 equivalent greenhouse gases
- Save enough energy to power a TV for 200 hours
- Recover 35kg of steel – enough for 25 new cans
- Stop CFC gases damaging the ozone layer

By donating a working appliance, you:

- Support a UK family in need
- Extend the lifecycle of the product
- Reduce manufacturing demand

Your Proof of Responsible Recycling

We provide:

- Waste Transfer Note – legal proof of disposal
- Recycling Certificate – shows where materials were sent
- Charity Donation Receipt – if applicable

FAQs

Q: Can you collect from inside my house?

A: Yes – we collect from any room, including upstairs.

Q: What if my item is very heavy or awkward?

A: We have the equipment and experience to handle it.

Q: Do you recycle everything?

A: We recycle over 95% of each appliance. The rest is treated as hazardous waste.

Q: Is there anything you won't collect?

A: We collect most household electricals. Please call if you're unsure.

Q: Can businesses use your service?

A: Yes – we offer commercial contracts and provide all compliance paperwork.
